

Powerful peace of mind in an uncertain world.

Electricity can't always be trusted. Bad weather, an aging infrastructure, accidents, animals and human error are just some of the ways the power can go out. In fact,

Connect Series Home Standby Generators

Standby Power.

Your power can go out at any time, but finding peace of mind doesn't have to be a headache, as it can often be with portable generators. Although they can be ideal for tailgating, camping and other outdoor uses, portable generators can be very noisy and require cords, cables and usually gasoline to operate, and they must be started up manually. Standby generators, on the other hand, are safe, permanent backup solutions for your home. Professionally installed and always at the ready, they automatically turn on the moment an outage strikes. Then they run powerfully, quietly and efficiently until the outage is over. They're simply the best choice for backing up your home and ensuring your peace of mind.
